In view of innovation, the specifications are subject to change without any prior notice and in the event of such changes, BMI MONIER® shall ensure that the new specifications are equivalent if not better.

Coverage and unit weight of tiles at various slopes

Slope (in degrees)	Minimum overlapping	Maximum batten space	Number of tiles	Unit weight
>17 and <27	100 mm	320 mm	0.966 / sq ft	± 4 kg / sq ft
>27	75 mm	345 mm	0.89 / sq ft	± 3.7 kg / sq ft

DIMENSIONALLY CONSISTENT

High quality toolings were used to produce BMI Monier Elabana roof tiles which gives it the dimensional consistency in shape and size to ensure high level of roof performance.

EASY INSTALLATION

Moulded with precision and uniformity to ensure dimensional stability for a consistent and perfect fit each time. Tiles can be laid cross bond and straight bond fashion.

COMPACT ROUND NOSE

The unique round nose, improves ageing by delaying fungus and algae growth at the nose of the tile. This feature is well-matched and suitable for Indian weather.

Advantages over other roofing tiles:

- Easy installation
- Double grooved tiles with variable overlap
- Wide range of long-lasting plain and double-tone colours
- Complete range of fittings
- High breaking strength
- Dimensional stability and low water absorption
- Three decompression chambers under the tile improves water-tightness at the tile overlapping area
- Low energy consuming manufacturing process
- Unmatched production capacity in India
